GENERAL INFORMATION

TRI-PLEX™ is an easy-to-use, multifunctional adjuvant for use with glyphosate, dicamba and other pesticides. TRI-PLEX™ deactivates hard water ions including Ca, Mg and Fe to improve pesticide performance. TRI-PLEX™ contains the research and field proven CONTROL WM™ polymer blend that reduces drift, allowing more pesticide to reach the target. TRI-PLEX™ also provides significantly higher retention of spray solution on plant surfaces. TRI-PLEX™ reduces evaporation of the spray droplet in the air and on the leaf surface allowing better uptake into the plant.

The concentrated all-in-one formulation provides water conditioning, surfactant, and a drift mitigation adjuvant blend in one convenient package.

TRI-PLEX™ recommended rate is 2 to 6 qt/100 gal. Use 6 qt/100 gal with products that contain dicamba and 2,4-D.

TRI-PLEX™ is compatible with all pesticide formulations.

STORAGE AND DISPOSAL

Protect from freezing. Store above 32°F. Do not reuse empty container. Dispose of container in accordance with federal, state, or local regulations.

**WARNING: Harmful if swallowed.
Causes eye irritation.**

PRECAUTIONARY STATEMENTS: Do not eat, drink or smoke when using this product. **If swallowed:** Call a POISON CENTER or doctor/physician if you feel unwell. **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do - continue rinsing.

FIRST AID:

Eye contact: Check for and remove contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately. **Ingestion:** Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.
