

BLAZE™ is a unique blend of extremely effective, non-ionic biodegradable surfactants. **BLAZE™** has been developed through years of comparative trials. The blend of different surfactants provides a synergistic response with glyphosate when additional surfactants are required by the label. **BLAZE™** is designed for industrial, turf, and right-of-way applications.

May be used in or near aquatic environments at labeled rates.

The **BLAZE™** is not intended for use in agriculture. **BLAZE™** has also been proven to be very efficacious with other non-agricultural herbicides.

DIRECTIONS

Always follow pesticide manufacturer's label for rates and mixing order. In the absence of a label recommendation, use 1-4 qt/100 gal based on experience. **BLAZE™** is concentrated and most herbicides will only require 1-3 qt/100 gal.

BLAZE™

Unique Non-Ionic Surfactant Blend Particulary Effective With Glyphosate
