

CONTROL DUO™

PREMIUM DRIFT MITIGATION, DEPOSITION, AND SURFACTANT SYSTEM

CONTROL DUO is a one-of-a-kind, multi-functional combination of a premium nonionic surfactant (NIS) system and **CONTROL WM™**, a superior drift mitigation and deposition aid for use with herbicides and pesticides.

CONTROL DUO contains a unique and highly effective NIS that enhances pesticide uptake.

CONTROL DUO contains the **CONTROL WM** polymer blend that has been proven in research and field trials to mitigate drift while increasing deposition of the pesticide on the target.

CONTROL WM provides significantly higher retention, usually twofold, of the spray solution on the plant surfaces and significantly reduces evaporation, allowing more pesticide uptake from a moist spray deposit. Additionally, **CONTROL DUO** surfactant system does not produce as many fine droplets as most surfactants do.

CONTROL DUO is compatible with all versions of glyphosate.

RECOMMENDED RATES are:

Ground: 0.5 to 2 qt/100 gal or 2 to 6 oz/A

Air: 1 to 4 qt/100 gal
