

CONTROL DUO™

Premium Surfactant, Spray Drift Mitigation and Deposition System

- **CONTROL DUO™** is a one-of-a-kind, multi-functional combination of a premium nonionic surfactant (NIS) system and **CONTROL WM™**, a superior drift mitigation and deposition aid for use with herbicides and pesticides.
- **CONTROL DUO™** contains a unique and highly effective surfactant system that enhances pesticide uptake does not produce as many fine droplets as most surfactants do.
- **CONTROL DUO™** contains a polymer blend that many research and field trials have proven to mitigate drift while increasing pesticide deposition on the target.
- **CONTROL WM™** provides deeper penetration into the canopy and higher retention, usually twofold, of the spray solution while significantly reducing evaporation, allowing more pesticide uptake from a moist spray deposit.
- **CONTROL DUO™** is compatible with all versions of glyphosate and approved by BASF for use as drift reduction adjuvant (DRA) with Engenia® dicamba herbicide.
- **Recommended rates:**
 - Ground:** Use 1 to 6 qt/100 gal. Use 6 qt/100 gal with products that contain dicamba and 2,4-D
 - Air:** Use 2 to 8 qt/100 gal.
