

CONTROL DUO™

Premium Surfactant, Spray Drift Mitigation and Deposition System

- **CONTROL DUO™** is a one-of-a-kind, multi-functional combination of a superior nonionic surfactant (NIS) system and the highly effective **CONTROL WM™** drift mitigation adjuvant (DRA).
- **CONTROL DUO™** contains a unique and highly effective surfactant system that enhances pesticide uptake and does not produce as many fine droplets as most surfactants do.
- **CONTROL DUO™** contains a polymer blend that many research and field trials have proven to mitigate drift while increasing pesticide deposition on the target.
- **CONTROL DUO™** humectant properties extend absorption time by allowing the spray deposits to remain in a liquid state longer.
- **CONTROL DUO™** provides deeper penetration of the spray solution into the canopy and increases the retention on the leaf surface, usually two-fold.
- **CONTROL DUO™** is compatible with all glyphosate formulations.
- **CONTROL DUO™** is approved for use with dicamba and 2, 4-D herbicides.
- **CONTROL DUO™** provides high performance at an economical price and the convenience of a combination product for use with herbicides and pesticides.
